

335 W Fiber-Coupled Diode Pump Laser Module

ST Series: ST3

ST3 delivers 335 W of power within 0.15 numerical aperture of 200 μm core fiber leveraging the industry-proven track record of Lumentum ST Series high-brightness pump laser family. It uses a new generation of high-power proprietary chip optimized for reliability at high power. The 335 W laser also supports the “build-your-own” kilowatt (kW) laser market.

The multimode pump module offers high brightness, small size, and simplified thermal management. The diode operates as distributed heat sources, allowing water-cooled architectures with predictable high reliability.

The ST Series is a unique solution for the fiber-coupled pump-laser market, offering powerful technical attributes in a cost-effective package.

Key Features

- 335 W output power into 0.15 numerical aperture (NA) of 200 μm core
- 915 nm wavelength
- High reliability
- 1060 nm feedback protection
- 0.22 numerical aperture (NA) fiber
- Isolated electrical contacts

Applications

- Fiber laser pumping
- Material processing

Dimensions Diagram

(Specifications in mm unless otherwise noted.)

Pinout

Pin	Description
A	Laser cathode (-)
B	Laser anode (+)

Specifications¹

Parameter	Symbol	Minimum	Typical	Maximum
Laser Characteristics at 25 A (BOL)				
Output power (W)	$P_{out, BOL}$	314 W	335 W	
Operating voltage at $I_{op, BOL}$	$V_{op, BOL}$	26.4 V	27.4 V	28.4 V
Maximum operating voltage	$V_{op, EOL}$	—	—	28.8 V
Electrical-to-optical conversion efficiency	PCE	44.2%	48.9%	—
Wavelength range (98% of power within band)	λ	905 nm	—	935 nm
Wavelength shift with temperature	$\Delta\lambda/\Delta T$	—	0.3 nm/°C	—
Back reflection isolation 1060–1150 nm		30 dB	—	—
Light within 0.15 NA		—	95%	—
Fiber Characteristics				
Fiber core diameter	d_c		200 μ m	
Fiber numerical aperture	NA	0.20	0.22	0.24
Fiber cladding diameter	d_{cl}		220 μ m	
Fiber buffer diameter ²	d_B		320 μ m	
Total fiber length	Lf	1.2 m	—	
Fiber bend radius		70 mm	75 mm	—
Fiber termination		—	None	—
Fiber axial pull force, 15 s		—	—	5 N
Fiber side pull force, 15 s		—	—	2.5 N

1. All electrical and optical performance data referenced at 35°C (case temperature) and $I_{op}=25A$, Beginning of Life (BOL), unless otherwise specified.

2. Low index coating.

Note:

Cold plate typically needs to be chilled to 25°C–30°C to maintain 35°C pump case temperature.

Environmental Requirements

Parameter	Minimum	Maximum	Notes
Case operating temperature (base of laser housing)	10°C	50°C	Mounting feet can be used to approximate base temperature.
Storage and transportation temperature (non-operating)	-10°C	75°C	Non-condensing under operation and storage.
Electrostatic discharge (ESD)	—	500 V	HBM
Maximum voltage between any pin and package	—	100 V	
RoHS 6/6			Compliant

Operating Considerations

Operating the diode laser outside at maximum ratings may cause device failure or a safety hazard. Power supplies used with the component must be employed so that the maximum peak optical power cannot be exceeded. CW diode lasers may be damaged by excessive drive current or switching transients. When power supplies are used, the diode laser should be connected with the main power on and the output voltage at zero. The current should be increased slowly while the diode laser output power and the drive current are monitored.

Device degradation accelerates with increased temperature, and thus the case temperature should be minimized and the unit operated in a non-condensing atmosphere.

A proper heatsink for the diode laser on a thermal radiator will greatly enhance laser life. Refer to the product application note for more information regarding heat sinking and mounting the product.

Electrostatic Discharge (ESD) Protection

ESD is the primary cause of unexpected diode-laser failure. Take extreme precaution to prevent ESD. Use wrist straps, grounded work surfaces, and rigorous antistatic techniques when handling diode lasers.

Laser Safety

Note:

This component requires provisions of drive and control electronics before emitting laser radiation.

Laser classification depends on the system control circuit and laser safety features provided.

This diode-pumped laser module is not 21CFR 1040.10 or IEC 60825-1:2014 certified. It is a component intended for system integration. Compliance with 21CFR 1040.10 and/or IEC 60825-1:2014 will need to be determined at the system level.

Lumentum has registered this laser with the FDA/CDRH as an OEM component. Please contact Lumentum for an FDA/CDRH accession number for this laser component.
